MITOWER⁺

1 Person Quick-Build Rolling Tower

The MITOWER PLUS only requires one person to assemble. The platform can accommodate one to two people at a time.

The rolling tower is compact and easy to transport when disassembled. Step by step, the smart design enables you to assemble the tower safely up to a height of 8 meters.

Platform girders and unique suspension mechanism give you maximum grip and simplify the assembling process. Double guardrail braces, a handy claw system and double brake castors make the light weight aluminium scaffold the most stable in its type.

- Strong and stable
- Compact and easy to transport
- One person assembly
- Unique suspension system
